1. Operations Research, Topographic Friction & PWD Cost Multipliers

To replace traditional heuristic or ad-hoc school allocations with rigorous mathematical optimization, the masterplan utilizes the **Maximal Covering Location Problem (MCLP)** formulated as a Mixed-Integer Linear Program (MILP) solved using the open-source CBC / PuLP optimization engine. Following comprehensive econometric auditing, the financial engine incorporates dynamic location-specific cost multipliers reflecting terrain logistics and material haulage premiums.

Mathematical Model Specification

Objective Function: Maximize total weighted population coverage across all habitations \$I\$:

Maximize $\sum_{i \in I} (w_i \times y_i)$

Subject To:

1. **Capital Budget Constraint (with PWD Hill Cost Multipliers):**

$\sum_{j \in J} (c_{up}(j) \times x_j^{up} + c_{new}(j) \times x_j^{new} + c_{tr} \times x_j^{tr}) \leq \text{Budget}$

2. **Coverage Logical Linkage:** Habitation i is covered ($y_i=1$) only if a facility is located within its effective walking radius:

$y_i \leq \sum_{j \in N_i} (x_j^{up} + x_j^{new} + x_j^{tr}), \forall i \in I$

3. **Site Exclusivity:** $x_j^{up} + x_j^{new} + x_j^{tr} \leq 1, \forall j \in J$

Topographic Walking Friction & PWD Hill Cost Multipliers

1. **Tobler Walking Friction:** Straight-line Euclidean buffers underestimate walking effort in the Eastern Ghats. Using Tobler's function $v(\theta) = 6 \times e^{-3.5|\tan \theta + 0.05|}$, terrain impedance reaches **1.8x to 2.4x** in rugged corridors.

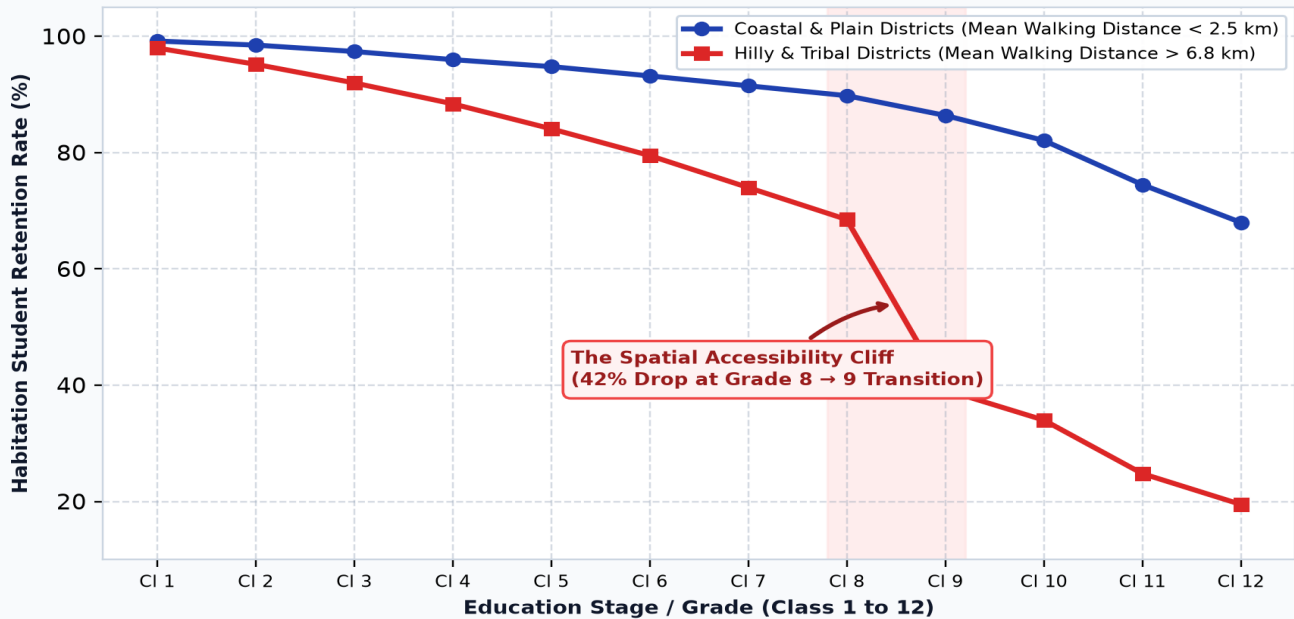

2. **PWD Hill Cost Index:** To account for material haulage and ghat road construction logistics, unit costs scale dynamically: $Cost(d) = Base\ Cost \times (1.0 + 0.18 \times (Friction - 1.0))$, ranging from Rs. 244L in coastal plains to Rs. 317L in high ghats.

8. Implementation Roadmap, Staff Retention & Governance

To achieve universal secondary schooling equity efficiently across all 314 blocks, the masterplan establishes a structured 3-phase rollout:

- Phase 1: High Vulnerability & Remote Tribal Corridors (Years 1-2 | Rs. 2,703.8 Cr / 45%)**
 - **Priority Districts:** Malkangiri, Koraput, Rayagada, Kandhamal, Gajapati, Nabarangpur, Mayurbhanj, Nuapada, Kalahandi.
 - **Interventions:** Fast-track construction of 588 dedicated girls' hostels, deployment of 1,172 student transit hubs `{{sec_totals['fleet_minibuses']:.}}` mini-buses, `{{sec_totals['fleet_feeder_vans']:.}}` feeder vans), and 4,115 subject teacher recruitments.
- Phase 2: Mineral Belts, Plateaus & Western Agrarian Plains (Years 3-4 | Rs. 2,102.9 Cr / 35%)**
 - **Priority Districts:** Kendujhar, Sundargarh, Deogarh, Balangir, Boudh, Sambalpur, Bargarh, Subarnapur, Angul, Dhenkanal, Nayagarh.
 - **Interventions:** Construction of greenfield high schools in dense mining periphery settlements and 3,200 subject teacher recruitments.
- Phase 3: Coastal Deltas, Disaster Retrofits & Urban Consolidation (Year 5 | Rs. 1,201.7 Cr / 20%)**
 - **Priority Districts:** Khordha, Cuttack, Puri, Jagatsinghpur, Kendrapara, Jajpur, Bhadrak, Balasore, Ganjam, Jharsuguda.
 - **Interventions:** 396 cyclone-resilient structural retrofits, advanced STEM smart-lab installations, and digital classroom integration.

Special Tribal Teacher Retention Cadre & PESA Land Protocols

- 1. Tribal Hardship Allowance & Retention Bond:** To resolve the historic 9,144 specialized teacher recruitment bottleneck in Scheduled areas, teachers posted in Tobler friction zones ($>1.8\times$) will receive a **25% Remote Area Allowance** paired with a mandatory 3-year rural posting bond.
- 2. PESA & FRA Fast-Track Land Resolution:** Greenfield school site selections prioritize unencumbered revenue wasteland with Gram Sabha consent under Section 4(i) of PESA to prevent construction delays.
- 3. Calibrated Transit Opex:** Annual operating expenditure is calibrated at **Rs. 67.6 Cr/year** (Mini-Bus @ Rs. 4.8L/yr, Van @ Rs. 3.0L/yr) including Mission Shakti female chaperone honorariums.
